

India artech solar

Who is India's largest solar tracker supplier?

Arctech's shipments in the region recently hit the 3.5 GW milestone. According to Wood Mackenzie Power and Renewables, Arctech was India's largest supplier of solar trackers in 2020 and held a 45% market share in 2021.

When did Arctech enter the Indian market?

Arctech entered the Indian market with its first project in 2015, and to date, the company has accumulated shipments of 3.9 GW across over 50 projects in the country.

How many patents does Arctech have?

The company holds more than 410 IP patents, reflecting its dedication to advancing solar technology. Arctech's solar tracking and racking solutions have significantly contributed to India's clean energy goals by increasing energy yield, reducing carbon emissions, and providing more cost-effective solutions.

Where is Arctech based?

It is easily accessible from all major industrial destinations in Delhi, Rajasthan, Gujarat, Madhya Pradesh, Haryana, Punjab, and Himachal Pradesh for the export of cargo," the company stated. Arctech has added more than 200 jobs to the local community by setting up this factory.

China-based solar tracking and mounting solutions provider Arctech has announced its first joint venture manufacturing base in India, Jash Energy, has entered into trial operation. The 3 GW solar tracker factory is located over 16 acres in Mundra, Gujarat.
