Who is integrated energy engineering?

Integrated Energy Engineering is uniquely diverse company that provides clients customised advanced Energy Systems and our specialised services make this transition an easy choice. The Affordable Energy Solution is our core development with aim of providing more sustainable and environmental energy choices to our communities.

What makes integrated energy unique?

Integrated Energy is unique in providing an offering which is firstly based on deep engineering understanding of the oil&gas and mining industries, secondly is independent from service company or technology suppliers, and thirdly is proven to be highly effective from a scale of small operations up to multi-billion dollar projects.

Who is integrated energy's principal technology consultant?

He is the author of several publications in the area including multiple professional papers (reported on front page of Wall Street Journal) and a book for Shell. Monica is Principal Technology Consultant at Integrated Energy and has been with the company since 2020. Her background includes lead roles in hydrogen and renewables and HSE.

Why is integrated energy important?

Integrated Energy enable safer, more valuable operations and projects, which are better for the people working on them and the environment around us. We do this by providing a better way of working considering people, process, organisation, technology and the physical working environment.

Why do you need a fully integrated solution?

We provide fully integrated solutions that consider a holistic view of the ways your business can achieve energy efficiency, reduce operational costs, and reduce your carbon footprint. We work hard to deliver the right solutions for your individual business case, and focus on return on investment as a key factor to our success.
