

Iran spi energy solar4america

Who is Solar4America technology?

Solar4America Technology, Inc. is a leading module manufacturer committed to providing optimal solar solutions for projects big and small. In just over one year, our Sacramento factory, the first to implement M10 technology, has become the second-largest domestic producer of solar modules in the United States.

What's new at Solar4America?

We are very excited to meet this important milestone for our company and offer the best domestic-made solar module products to our customers to meet the increasing demand for American-made modules. The Solar4America module manufacturing facility now produces 700MW with capacity ramping up to 2.4GW in 2023.

How many solar panels can S4A produce?

Currently S4A has production capacity on a full line of modules including legacy production in the form of 60-cell 330W and 72-cell 410W modules and 410W 108 half-cut all-black panels for the residential market, as well as commercially-suited 550W bi-facial solar panels.

SPI Energy Co., Ltd., (NASDAQ:SPI) (the "Company"), a global renewable energy company and provider of solar, storage and electric vehicle (EV) solutions for business, residential, government ...
