Who is Jema energy?

At Jema Energy we are specialists in bus line electrification projects. From the pre-sales phase, where our engineering team advises you to ensure that the charging systems you need are the most suitable for your installation, to the operation and maintenance phase, Jema works with you to achieve a successful project.

Why should you choose Jema energy?

We have a wide range of products to make the electrification of a line a reality from a single source. Jema Energy develops high quality interoperable chargers with the aim of maximising installation performance and minimising operating and maintenance costs.

Why did Jema acquire CE+T?

JEMA and CE+T have been working together for many years as JEMA uses CE+T Power inverters in its solutions. In addition, both companies work in similar or complementary markets. The main goal of this acquisition is to go even further in the development of innovative power solutions, including monitoring and cabinet integration.
