Kenya Power has unveiled a new backup National Control Centre aimed at bolstering the security of electricity supply across the. Kenya Power bolsters grid resilience with the launch of a backup national control centre, ensuring secure electricity supply across the nation. Learn about this pivotal initiative and its implications for energy ...

What Size Of Backup do You Need. The size of the solution is dependent on what you require to be powered during an outage. We therefore differentiate between essential loads (lights, security systems, fridge, freezer, TVs, internet routers, etc.) and non-essential, power-heavy loads such as water heaters, cookers, aircons, and pumps.

configure a solar system to serve as backup and still provide power even when the grid is present. If your house is not connected to the grid, you first need to minimize your power requirements. This can be done by implementing energy-efficiency measures (such as energy-saving bulbs) and doing away with non-essential energy-consuming appliances.
