Zambia is potentially self-sufficient in sources of electricity, coal, biomass and renewable energy. The only energy source where the country is not self-sufficient is petroleum energy. Many of the sources of energy where the country is self-sufficient are largely unexploited. [1] As of 2017, the country's electricity generating capacity stood at 1,901 megawatts.

Mr Mulenga noted that as the country is transitioning from fossil fuels to green energy sources, Zambia needs to partner with Korea which has technological advancement.
