

Latvia seeo2 energy

Who is seeo2 energy?

SeeO2 Energy Inc. is a company focused on efficiently converting carbon dioxide(CO2) into marketable and clean value-added fuels and chemicals using reversible fuel-cell technology. SeeO2 Energy helps you turn GHG emissions into assets.

How much money has seeo2 energy raised?

SeeO2 Energy has raised a total of \$156.8K in funding over 2 rounds. Their latest funding was raised on Jul 14,2020 from a Seed round. SeeO2 Energy is funded by 2 investors. Sustainable Development Technology Canada and Techstars are the most recent investors. SeeO2 Energy has raised a total of \$156.8K in funding over 2 rounds.

Which energy sources are used in Latvia?

Latvia has underground gas storage facilities at the Incukalns UGS,with a capacity of 4.47 billion m³. Natural gas companies include Latvijas Gaze. Renewable energy includes wind,solar,biomass and geothermal energy sources. Almost half of the electricity used in the country is provided by renewable energy sources.

How much electricity does Latvia use per capita?

In 2018,electricity consumption per capita was 3731 kWh. Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030. The 2021-30 plan set a target of reducing greenhouse gas emissions by 65% compared to 1990. There is a target of being carbon neutral by 2050.

What is the main renewable resource in Latvia?

The main renewable resource is hydroelectric power. Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment,especially taking into consideration the fact that Latvia cannot offer big subsidies in order to attract investment.

What is a hydro power station in Latvia?

Hydro is an important power source in Latvia,Kegums Hydroelectric Power Station is the oldest hydro power station in the country,built in 1940. It was agreed in 2018 that Estonia,Latvia and Lithuania would connect to the European Union's electricity system and desynchronize from the Russian BRELL power system.

Calgary-based SeeO2 Energy. A Calgary entrepreneur is working to reverse rising carbon dioxide (CO₂) levels, with the launch of a first-of-its-kind solution that converts greenhouse gas emissions into high value fuels and chemicals before they are released into the environment. The groundbreaking product has

SeeO2 Energy Inc. | 1,441 followers on LinkedIn. Fuels and chemicals from CO₂ | SeeO2 Energy Inc. vision is to efficiently convert captured CO₂ and/or water to fuels and chemicals using reversible solid oxide fuel cell technology. We provide our customers in the chemicals, metal processing, polymers, and utilities industries

with a reliable, onsite and cost competitive ...

by SeeO2 Energy Inc. (Calgary, Alta., Can-ada; com) takes advantage of thermodynamics in a high-temperature electrolyzer to efficiently convert car-bon dioxide into CO and O2 with 100% selectivity. Based on the principle of a reversible solid-oxide fuel cell, the technology employs a perovskite-based

SeeO2 Energy has developed a high temperature electrolyzer that uses CO2 from an industrial company's waste stream and converts it into carbon monoxide, hydrogen, oxygen or syngas, all of which can be used downstream or sold for ...

Kevin graduated from Dalhousie University in 2021 with a BSc in Chemistry, minors in Computer Science and Mathematics, and a Certificate in Data ...

SeeO2 Energy Inc. has made it into the Start Up Energy Transition top 100 start-ups of 2019!!! Proud to announce that we have made the SET100 list for 2019. Placing out of 450 start-ups from 80 countries, we look forward to our continued contribution to a sustainable future! Looking forward to showcasing at the World Energy Congress in Abu ...

Haris is a materials scientist and electrochemist with extensive research and development experience in synthesis and characterization of materials ranging from bulk materials and composites to advanced materials, such as, nanomaterials and metallic/ceramic thin films.

During his stay, he completed his MSc and published research in the fields of solid-state chemistry and machine learning. Alternative energy and sustainability always colored his research interests which resulted in him being a part of different programs and initiatives in Alberta.

Overall, SeeO2 Energy and its competitors have raised over \$1.39B in funding across 43 funding rounds involving 105 investors. There is 1 public company in the entire competition set. Below is a comparison of top competitors of SeeO2 Energy

With most energy being generated from fossil fuels, the release of carbon dioxide (CO2) was seen as an inevitable side effect of producing enough energy to sustain the incredible, and rising, rate of human consumption. SeeO2 saw a future in which CO2 could be collected, broken down and used as part of a range of chemicals. SeeO2 Energy Inc ...

Paul Addo, co-founder of SeeO2 Energy, is developing a patented technology that converts GHG emissions at industrial facilities to fuels. The company's technology transforms carbon dioxide - a greenhouse gas - into useful industrial gases like carbon monoxide and syngas, which is used in plastic, chemical and metal processing.

We are developing an efficient and a high performance reversible solid oxide cells (RSOFCs). Our technology, which involves the use of a high-performance catalyst material, allows the electrochemical conversion of water to hydrogen, carbon dioxide (CO₂) to carbon monoxide (CO), and CO₂ and water to produce syngas, a mixture of CO and H₂. The products (syngas, H₂ ...
