By understanding the major factors currently restricting the usage of solar panels in Latvia for producing electricity, it will become clear, what should be the necessary actions to resolve that. ... As the household did not have any battery for the storage of electricity, around 60 kWh/month were fed into the grid because the electricity was ...

First: Make sure you have the right battery for your inverter, as it plays a critical role in its performance. Second: Place both the inverter and battery in a dry and well-ventilated area to prevent overheating and moisture damage. Third: Use your inverter regularly. This helps to keep the battery in good condition and extends its life.
