Lebanon's civil war is history. It ended before the global proliferation of identity conflicts in the 1990s. It was characterised by its durability (April 1975-December 1990); by its complexity, made up of embedded and overlapping domestic and regional conflicts involving a wealth of actors - local and foreign, state and non-state; and by its high proportion of civilian casualties ...

France never gave Lebanon its independence or independence to any of its colonies but they changed their business model, as opposed to having direct rule and spending tons of money on an army garrison they would set up a local cronie elite class and give them wealth and power then use their fascism/corruption to put their countries in extreme debt with very high interest rates ...

I've been researching Lebanon's religious demographics and stumbled upon these estimates: Muslims: Approximately 60% (Split almost equally between Shi'a and Sunni, each around 30%) . Christians: Roughly 35%-40% (With Maronites as the most numerous, followed by Greek Orthodox, Armenian Apostolic, and other denominations) . Druze: About 5-7% . I'm curious to ...

Solar is much better, technically speaking. Generator's electricity isn't perfect, the frequency is not exactly 50 Hz but rather 48-49 Hz which will cause everything to run less efficiently (for example your refrigerator will not reach its temperature as the circuits will not enter resonance mode, some electronics will have a shorter lifetime like spotlights and routers ...). Additionally, the ...
