Solar photovoltaic (PV) panels have gained immense popularity in recent years as a clean and sustainable source of energy. They offer an eco-friendly way to generate electricity and reduce our reliance on fossil fuels. However, when it comes to choosing solar panels for your home or business, it's crucial to understand that not all PV panels are created equal.

Corporate Social Responsibility Frazer Solar incorporates CSR activities across all aspects of its operations and Lesotho was no exception. First and foremost was the inclusion in the project of an initiative to eliminate the use of dirty, dangerous, dim and expensive paraffin and candles as the main source of lighting for the entire country, some 350,000 homes.

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru. Lesotho is one of the least electrified countries in the world, with a rural electrification rate estimated at below 20% - and solar mini-grids offer an ...
