I found a 1000W pure sine wave inverter that has good reviews and looks awesome, but the manufacturer said "this device would not work with Lithium Iron Phosphate batteries (LiFeP04)." Why wouldn't it work with a LiFeP04 battery? Don't you just hook it up to the battery terminals and go? Why would it work on other batteries and not LiFeP04?

Compatibility is the first and foremost consideration when setting up communication between a lithium battery and a hybrid inverter. Not all inverters are compatible with all lithium batteries. Therefore, it is crucial to ensure that the inverter you choose is designed to work with the specific type of lithium battery you plan to use.
