An average Lithuanian household needs a 2-3 kW power solar panel. So within a year of using a 2 kW solar panel, a household would approximately save 190 euros, around 930 trees, and reduce CO2 emission by 37 tons. Of course, the return depends on the panel's size and whether you rent or buy it, but the results are evident."

Recently Lithuania in pursuit of the EU energy plans passed amendments stating that everyone had the right to generate and use renewable energy sources from remote solar power plants." While this is claims to be the first online platform for directly buying solar power, some community energy schemes would operate in a similar fashion.

15 · Waaree Solar Americas announced it has started trial production of solar panels at its manufacturing facility in Brookshire, Texas.
