Is European energy building a wind farm in Lithuania?

Earlier this year, European Energy started the construction of its first wind farm in Lithuania at Anyksciai with a capacity of 49.5 MW. Knud Erik Andersen, CEO of European Energy, said: "The expansion of renewable energy in Lithuania is something that we are honored to be a part of."

Is Lithuania a net energy importer?

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy. Long-term aims were defined in the National Energy Independence strategy in 2012 by Lietuvos Seimas.

Will Lithuania achieve a climate-neutral energy sector?

Lithuania closed the Ignalina Nuclear Power Plant in 2009 and currently operates synchronously with the Russia-Belarus power system, though a de-synch is planned in early 2025. To achieve a climate-neutral energy sector, Lithuania will have to more than triple the amount of renewable energy generated.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

Why is Lithuania investing in alternative energy import routes?

This is because ever since the reestablishment of its independence, Lithuania has been investing in alternative energy import routes. These included the development of the Butinge oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipeda LNG terminal and the Gas Interconnection Poland-Lithuania.

Will Lithuania create a green hydrogen system?

Lithuania has allocated EUR50m to create a green hydrogen system of 65 megawatts (MW) with an annual volume of more than 8,000 tons, to be completed by 2027. Visaginas's Ignalina Nuclear Power Plant once provided 70% of Lithuania's electricity and exported energy to elsewhere in the Soviet Union.

Knud Erik Andersen ir Mikael D. Pedersen yra 2004 metais pradejusios veikti imones European Energy steigėjai. Tuo metu Europos valstybiu prisiimta misija buvo Europos energetines nepriklausomybes sukurimas, tad jos esme ir gludi European Energy pavadinime.
