Enline Solutions leverage a modular architecture, where each solution--Design (D), Power Generation (PG), Grids Operation (GO), and Industry (I)--is composed of independent ...

Dynamic Line Rating (DLR) is a key grid enhancing technology, crucial for the energy transition, designed to ensure optimal infrastructure usage by using real-time data to determine the capacity of the line. This technology helps prevent overloads, optimizes transmission usage, and supports the integration of renewable energy sources.

Our cloud-based system leverages Digital Twin technology to deliver comprehensive solutions for the whole electrical energy cycle value chain, from generation to consumption. ...
