Malta's innovative pumped-thermal energy storage (PTES) technology is a like-for-like replacement for fossil-fueled thermal power plants. It generates 100-MW and more of clean dispatchable power and can also supply clean heat for district heating and industrial processes. The heat pump uses variable renewable electricity to charge the thermal ...

Directive (EU) 2023/2413: A New Era in Energy Storage Regulations. Malta Inc. explores the Implications and Opportunities. On March 14, 2023, the European Commission took a significant step towards reforming the European electricity market, addressing the urgent need to reduce reliance on gas-fired generation by adopting non-fossil flexibility solutions like energy storage ...

From Russia to Malta. BusinessDay's findings showed that in July 2024, over 200,000 tons products of gasoline from Malta were allegedly discharged into a Jetty owned by Matrix Energy. "This represents about 25 percent of Nigeria's monthly PMS consumption going to a relatively small player with only 150 retail stations," a document said.

A Malta energy storage plant using renewable power can displace coal-fired generation to reduce the need for fossil fuels and bring millions of annual carbon dioxide emissions down to zero. 333,977. Elimination of emissions from a single coal plant is equivalent to taking 333,977 gasoline-powered passenger vehicles off the road for a year.
