The Tesla Energy account on X announced the news on Thursday, saying that the Powerwall home battery system had launched in the island country. Buyers in the country may also qualify for a government incentive of up to 7,200 euros (~\$7,786) when adding the home battery to a pre-existing solar interface, as Tesla notes in the post.

A traditional solar system without a Powerwall does not function during a grid outage. If more solar energy is produced than can be used or stored during an outage, Powerwall will signal your solar inverter to reduce or turn off to protect your home from excessive power produced. This typically occurs when Powerwall is approaching 100% charge.

That's a heck of a lot of capacity. And while the Tesla Powerwall 2 is technically more "stackable" in its capacity than the Powerwall 3, the odds of your home's energy storage needs exceeding ...
