At TEP the University of Birmingham is building an innovation centre that will provide businesses with the chance to develop their technology in collaboration with university staff at the energy park. The Birmingham Energy Innovation Centre will be a hub for training associated with state-of-the-art energy, waste and low-carbon transport systems.

Final energy consumption has slightly grown between the years 2000 and 2021. In 2021 the final energy consumption reached 25 Mtoe (at normal climate), i.e. it was by 1 Mtoe higher than in 2000. Energy savings and structural changes were not able to fully compensate the energy consumption growth driven by the activity and other effects.
