Peregrine analyzed 60,000 substations across the U.S. grid over a three-year period and found League City to be one of the weakest links on the grid with heavy congestion and the inability to move power efficiently. Texas has prioritized development of energy storage statewide to avoid future grid outages like the one that left League City ...

Our team of qualified experts with an established track record executing over 50 GWs of renewable energy and energy storage facilities across the North American energy markets, is focused on developing emission free assets in ...

Before the permitting process takes place, League City will first develop an energy storage ordinance. An ordinance and proper permitting for energy storage systems that protect Texans while also allowing for reasonable projects to be built will ensure communities can safely benefit from the many advantages brought by these projects.
