

Micronesia wartsila oyj

Who owns Wartsila Marine Turku?

The former Wartsila Marine Turku Shipyard is now owned by Meyer Werft under its Meyer Turku subsidiary and the Helsinki shipyard is operated by a company of the same name owned by the Canadian Davie Shipbuilding. Wartsila is a provider of power plants in distributed and flexible power generation.

Who is Wartsila Oyj Abp?

Wartsila Oyj Abp provides technologies and lifecycle solutions for the marine and energy markets. The Company offers engines, propulsion systems, hybrid solutions, data and digital tools, liquid and gas handling on vessels, and integrated powertrain systems, as well as services to manage and optimize complex energy systems.

What products does Wartsila offer?

The core products of Wartsila include technologies for the energy sector, including gas, multi-fuel, liquid fuel and biofuel power plants and energy storage systems; and technologies for the marine sector, including cruise ships, ferries, fishing vessels, merchant ships, navy ships, special vessels, tugs, yachts and offshore vessels.

What is Wartsila's market share?

At the end of 2023 Wartsila's market share for gas and liquid fuel power plants was 13%. Wartsila's biggest competitors in the marine market are MAN Energy Solutions, Caterpillar Inc. and Kongsberg Gruppen. Key competitors in the energy market include General Electric, Siemens, Mitsubishi Heavy Industries and Ansaldo Energia.

What services does Wartsila offer?

Wartsila also provides products and services for grid stability management, utilization of gas flares, pumping applications (such as pump and compression drives), financial services, and project management services for projects concerning power generation.

What type of engine does Wartsila make?

Wartsila produces a wide range of four-stroke medium-speed diesel, gas and dual- and multi-fuel engines for marine propulsion, electricity generation on board ships and for land-based power stations. The engine models are identified by the cylinder bore diameter in centimeters, which as of 2024 range from 20 to 46 centimetres (7.9 to 18.1 inches).
