

# Mobile bess Cayman Islands

What is mobile Bess & how does it work?

By storing low-cost off-peak grid power and dispatching it onsite as needed, mobile storage provides operators with emissions and noise-free electricity - often for days or weeks without having to recharge. Mobile BESS products can also charge from local microgrids powered by renewable energy sources like solar panels and wind turbines.

What is a Bess mobile storage system?

They withstand challenging on- and off-road conditions such as construction sites and rough dirt roads. Other mobile BESS are built into standard shipping containers for easy transport. Mobile storage systems range in capacity from 200 kilowatt-hours (kWh) to over 1,000kWh.

How does a mobile Bess charging system work?

Mobile BESS products can also charge from local microgrids powered by renewable energy sources like solar panels and wind turbines. Some providers also offer a "battery swap", where they will replace an empty mobile BESS with a fully charged unit to take the charging burden away from the customer.

Why should you choose a silent mobile Bess?

The virtually silent mobile BESS enhance guests' experiences far more than noisy generators. They've already reliably handled fluctuating loads like stages, lighting, LED walls, and sound systems for days, and can be operated indoors.

Allye Energy's Max solution, a mobile BESS unit using repurposed EV batteries. Image: Allye Energy. New company Allye Energy has raised \$900k (US\$1.1 million) to scale up production of its mobile battery energy storage system (BESS) using second life EV batteries.
