5 · Sunrise and sunset times, civil twilight start and end times as well as solar noon, and day length for every day of December in Morwell. The day length increases by 9 minutes over the course of December 2024, from 14 hours, 40 minutes on the first day to 14 hours, 49 minutes on the last in Morwell, Victoria.

We would expect a 6kW solar system in Morwell to produce 21.60kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.

Morwell, Victoria, Australia is a decent location for year-round solar energy production. However, the effectiveness varies with each season due to changes in sunlight exposure. During summer, the solar panels would be most productive as they can generate around 7.09 kilowatt-hours (kWh) per day for every kilowatt (kW) of installed solar capacity.
