Zambia was Namene's first carbon project, which has since seen almost a quarter of a million solar lights delivered across all ten provinces since 2021. This rapid growth was underpinned by our trailblazing strategy to make solar lights affordable and accessible to all. Understanding the carbon value of a solar light

In our early years, our dedicated product design team manufactured and delivered our first solar light, the SM100. It was a breakthrough innovation which won multiple awards and built a reputation for Namene as a solar company that produced high-quality, affordable products for off-grid and low-income customers.

As full service solar specialists it delivers end- to-end scalable solar systems that save money and combat climate change. By changing the way people work, study and play Namene Solar can fight climate change together with sustainable lights that work for people and the planet. That is why they created their award winning SM100, the affordable ...
