

Should Namibia invest in green hydrogen?

While oil and gas projects can offer immediate job prospects, the green hydrogen sector promises long-term jobs in renewable energy, technology, and innovation. A skilled workforce trained in both sectors could ensure that Namibia meets its energy demands while fostering sustainable development. 5.

What is Namibia's energy future?

Some of the report's key findings include, solar and wind with storage make up the largest share of Namibia's energy future under a least-cost energy investment scenario to 2030 and 2040, cumulatively accounting for 70% and 77% of the country's installed capacity, respectively.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

What energy system does Namibia have?

Namibia currently has a small energy system that is dominated by its 347 megawatts (MW) Ruacana hydropower plant. The country is also considering an additional hydro-power plant, the Baynes Hydro-power Project on the Kunene River.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Can Namibia achieve its dual energy objectives?

Notwithstanding the potential synergies between green hydrogen and oil and gas production, Namibia may still encounter significant obstacles in achieving its dual energy objectives. These include environmental impact concerns, technological inefficiencies, economic viability concerns and integration complexities.

In our October episode of Project Features, Toni Beukes and Giuseppe Surace from Hyphen Hydrogen Energy joined us to discuss Hyphen's renewable ammonia project in Namibia. The recording is available on the AEA's website, and you can also download the speaker presentations.. Namibia has some of the best combined solar and wind resources globally, ...
