

# Namibia store electrical energy

Who owns electricity in Namibia?

The state-owned electricity utility NamPower owns and operates the transmission networks in Namibia, which connects various regional markets to Namibia and facilitates the active trade of electricity.

Why are the units of electricity sold in Namibia so small?

The units of electricity sold locally in Namibia (i.e. the grey line in Figure 32) are substantially smaller than the total units sold by NamPower. This is because electricity sales to the Skorpion Zinc Mine, Orange River Projects and cross-border clients are excluded from the electricity sold locally.

Why is Namibia not getting enough electricity?

Namibia's domestic electricity supply has failed to keep pace with rising demand, and Namibia generates less than half of the energy it consumes.

What is the current Electricity Act in Namibia?

The current Electricity Act in Namibia is Act No. 4 of 2007. It establishes and outlines the functions of the Electricity Control Board and regulates the electricity supply industry in Namibia.

How much electricity does Namibia export?

of 55.2 percent registered a month earlier. However, the index registered a decline of 11.7 percent yearly. During the period under review, Namibia exported a total of 11 777 MWh of electricity of which 81.2 percent was supplied to STEM Sales-SAPP, followed by Botswana (9.3%), while 5.6 per

Does Namibia pay monetary compensation for electricity exports?

No monetary compensation is paid for electrical energy fed into a distribution network in Namibia. Instead, electricity exports are credited at the distributor's avoided electrical energy cost and used to offset future electricity imports by the net metered customer.

What started out in a corner of the main branch, soon grew to become a fully-fledged store. Pupkewitz Megatech opened the first Renewable Energy branch in Windhoek in March 2020 and it was officially opened by the Deputy Director of Energy at the Ministry of Mines and Energy, Mr. Daniel Zaire and the CEO of the Pupkewitz Foundation and shareholder, Mrs Meryl Barry.

technologies can play in addressing the country's current electricity supply ...

Namibia is well endowed with renewable energy resources, including hydro, and natural gas, which have not been fully exploited. The Government's energy sector goal NDP5 is to have a sustainable mix of locally generated capacity of 755MW by 2023 to support households and industry, reduce reliance on imports, and increase the national electricity ...

The project will store surplus renewable generation and imported electricity for use during peak periods, reducing dependence on the local Van Eck coal power plant, enhancing grid stability, and incorporating more renewable energy resources into Namibia's power system. This will ultimately help in decreasing greenhouse gas emissions.

o Day Ahead Market-SAPP and Eskom Orange River supplied Namibia with 9.6 percent and 4.3 percent of electricity, respectively. Chart 3: Electricity Sales Composite Index, Percent o The Electricity Sales Composite Index for June 2022 posted a monthly decline of 1.3 percent, compared to a reduction of 1.9 percent recorded in May 2022.

NAMIBIA IMPORTS AN alarming amount of its electricity from its neighbouring countries. National power utility NamPower imports between 50% and 60% of its energy requirements, and a bulk of this comes from coal-powered generation stations in South Africa. The production of electricity from non-renewables such as coal have been a topic of concern. ...

NamPower has secured N\$2.6 billion in funding from the World Bank to expand its transmission network and integrate renewable energy into the grid. The first-ever energy project funding from the Bretton Woods Institution will be for the Transmission Expansion and Energy Storage (TEES) Project which is intended to improve the reliability of the country's ...

The Electricity Control Board (ECB) was tasked by the Ministry of Mines and Energy (MME) to review and update the National Integrated Resource Plan (NIRP). Hatch, a Canadian Consultancy firm, was contracted to do the review and update of the NIRP for Namibia focusing on electricity. The NIRP is a 20 year electricity sector development plan.

This map provides an overview of Namibia's electricity infrastructure. Transmission lines are clearly marked on the map (ranging from 132kV to 400kV). ...
