

Nauru zef energy

Does Nauru have energy resources?

Nauru, like most Small Island Developing States (SIDS) in the Pacific region, has scarce local energy resources limited to solar energy and biomass and imports most of the energy consumed from abroad. To address this, the country has started the Supporting Mainstreamed Achievement of Roadmap Targets on Energy in Nauru project.

How can Nauru reduce its reliance on fossil fuels?

In order to achieve Nauru's ambitious goal of reducing the country's high reliance on imported fossil fuel by meeting 50% of its energy needs from renewable energy sources by 2015, the Nauru Government requested technical support from GIZ, SPC and IRENA in the development of a Nauru Energy Road Map in early 2012.

What is Nauru energy policy framework (Nepf)?

The Nauru Energy Policy Framework (NEPF) was endorsed in 2009 and outlines broad aims and strategies for the energy sector, including power, renewable and energy efficiency. The NUC currently provides all electricity services to Nauru except for RPC and the main processing plant of RONPHOS.

Does Nauru have an energy road map?

Currently Nauru is working on an Energy Road Map, including action plans for the development of renewable energy and energy efficiency sufficient to significantly lower imports of diesel fuel for electricity generation.

Who is Zef energy?
