Food truck - Getting a food truck can be achieved in three ways. You can build your own food truck which can cost at least \$50,000, or you can buy a used food truck which can start at \$30,000 and can go as high as \$100,000, and you can also buy a new fully-fitted truck that can go between \$50,000 to \$175,000.

I'm designing my food trailer and remembered family members having solar panels on their RV to power their appliances. I was thinking of using a gas griddle and fryer and using the panels to power the fridge, prep table and lights while having a good generator for back up or minimal long term usage and just generally more environmentally friendly (which is a long term goal)

The Solar Power Pops Truck has already made its way through New York City, Boston, and Baltimore, and it's on a mission to educate the nation about solar power. Equipped with solar panels that help power the kitchen that produces the truck's tasty treats, this truck is living by the virtues it's teaching.
