

# New Zealand strong solar battery

Why should you choose a solar battery in NZ?

Solar batteries enable you to become energy-dependent and reduce your electricity bills. Discover Solar has partnered with a reputable solar battery manufacturer, Sungrow, which has a robust track record of 25 years in the industry. We have two types of solar batteries in NZ, but we will help you choose the right one for your application.

How many types of solar batteries are there in NZ?

We have two types of solar batteries in NZ, but we will help you choose the right one for your application. DC Coupled Battery System: You can only connect solar panels to this battery storage type, meaning it can only store energy generated by your solar panels.

How do solar batteries work in NZ?

Solar batteries provide a smart way to store solar energy in NZ. The battery system lets you store excess power generated by your solar panels for later use at night or during cloudy days. Our team at Discover Solar is passionate about helping the local community find the ideal solar solution.

What is the best solar battery storage system in NZ?

AC Coupled Battery System: The AC-coupled battery storage system is the most common solution to store solar power. This battery system works seamlessly with any inverter and has a straightforward installation.

Why Choose Our Solar Batteries in NZ?

Which solar batteries are available in Dunedin?

Experience reliable energy solutions for your home with affordable solar batteries from Dunedin Solar: Tesla Powerwall, BYD Lithium Battery and more.

Why should you buy a solar battery?

Energy independence: With a solar battery, you can store excess solar energy during the day and use it at night, reducing your reliance on the electricity grid. Cost savings: By storing excess solar energy, you can reduce the amount of electricity you need to purchase from the grid, potentially saving you money on your electricity bill.
