

# New energy storage project in northwest industry

Who is NextEra Energy Resources?

NextEra Energy Resources, the developer of the uncontroversial Troutdale and Mount Vernon battery storage projects, will be the guinea pig to test Whatcom County's tightened zoning rules, which limit large-scale battery energy storage to parcels zoned industrial or rural.

Who are PNNL's energy storage researchers?

A handful of PNNL's highly cited energy storage researchers. From left to right: Jie Xiao, Yuyan Shao, Jason Zhang, and Jun Liu. (Photo by Andrea Starr | Pacific Northwest National Laboratory) PNNL's energy storage experts are leading the nation's battery research and development agenda.

Where is NextEra Energy building a battery farm?

This battery farm built by NextEra Energy entered service in Parrish, Florida in 2022. That company is also active in Oregon and wants to build the first standalone, utility-scale battery storage projects in Washington's Skagit and Whatcom counties. (Doug Murray for FPL) This article was first published by the Salish Current.

How can PNNL help a building become part of energy storage?

Our experts in advanced building controls are helping buildings become part of the energy storage solution, enabling homes and buildings to flex and adjust their loads automatically. PNNL research provides a clear understanding of the technology needs for integrating energy storage into the grid.

Why do we need advanced energy storage technologies?

Advanced energy storage technologies that deliver better performance and duration at lower costs are key to creating a cleaner, more reliable, and resilient electric power grid and all the benefits that clean, abundant energy provides to our country, including a decarbonized transportation sector.

Does Oregon need a public hearing for battery energy storage projects?

The wariness is far from universal though. Oregon's first standalone, large-scale battery energy storage projects in Troutdale, Hillsboro and North Portland were permitted by city planning departments, who in some cases did not even require a public hearing.

Energy Northwest statement on X-energy-Dow announcement MA 13-01 New renewable energy storage technology unveiled at Nine Canyon Wind Project; as well as to the entire advanced ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical challenges remain.

The Northwest Branch of State Grid Corp of China, responsible for power generation in five provinces and

# New energy storage project in northwest industry

regions in Northwest China, including Gansu province and ...

New energy storage project in northwest industry MA 13-01 New renewable energy storage technology unveiled at Nine Canyon Wind Project; ... as well as to the entire advanced nuclear ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

With the combination of Internet, information technology and energy, energy storage industry plays an important role in the adjustment of energy structure with its abundant ...

Despite the effect of COVID-19 on the energy storage industry in 2020, internal industry drivers, external policies, carbon neutralization goals, and other positive factors helped ...

The U.S. Department of Energy (DOE) announced it will provide \$125 million in funding to support two Energy Innovation Hub groups that will look at challenges facing the ...

Wilsonville, Ore.- October 9, 2025 - Salt River Project (SRP), a not-for-profit public power utility serving the greater Phoenix metropolitan area, and ESS (NYSE:GWH), a leading manufacturer ...

Pacific Northwest National Laboratory's 2020 Grid Energy Storage Technologies Cost and Performance Assessment U.S. Department of Energy's Energy Storage Market Report 2020 ...

China's power storage capacity is on the cusp of growth, fueled by rapid advances in the renewable energy industry, innovative technologies and ambitious government ...

Depending on how energy is stored, storage technologies can be broadly divided into the following three categories: thermal, electrical and hydrogen (ammonia). The electrical category ...

Energy storage developers are securing significant capital and strategic partnerships, with ESS Inc launching a 50MWh iron flow battery pilot, Energy Vault closing a US\$300 million ...

4 &#0183; Technological Breakthroughs: Long-duration energy storage is being rapidly deployed, with compressed air energy storage projects accounting for ...
