GET THE LOWEST SOLAR + STORAGE INSTALLATION COST. Yotta's solution significantly reduces soft costs, known in the industry to be the most challenging aspect of energy storage scalability with solar. Yotta's decentralized system also minimizes many of the variable engineering procurement, and construction (EPC) costs associated with current centralized ...

Yotta's SolarLEAF(TM) (SL-1000) is a fully-integrated energy storage technology that seamlessly integrates behind photovoltaic (PV) modules on commercial rooftops which solves one of the industry's biggest challenges of "Where do you put the batteries?".Engineered with an advanced passive thermal regulation technology, SolarLEAF safely enables a distributed format while ...

Yotta Store is a next generation storage system aiming to scale out to the yotta byte range and scale up to millions of concurrent read and writes per record.The goal is to have two orders of magnitude more throughput than DynamoDB, dollar per dollar, while maintaining a sub-ms latency eck our benchmarks. Yotta Store is built on top of a 512 bit distributed machine, ...

Storage as a Service; ... Yotta's Compute as a Service is an infrastructure as a service (IaaS) that allows businesses and customers to access virtualised machines from Yotta's Uptime Institute certified TIER IV data center. This service further provides a wide selection of instance types, which is optimised to fit different workloads and use ...
