A map of the proposed East Pye Solar Project. Image: Island Green Power. Island Green Power has unveiled plans for a utility-scale solar and battery energy storage system (BESS) project, slated for development in Norfolk, England. With a potential generation capacity of 500MW, the East Pye Solar Project will be classed as a Nationally ...

A 1.5kW system in Norfolk-island will produce about 5.76kWh per day in good conditions. A 3kW solar system will produce about 11.52kWh per day. A 5kW solar system will produce about 19.2kWh per day. A 10kW solar system will produce about 38.4kWh per day. Since 2008, Solar Choice has provided 23 quotes for homes and businesses in the 2899 area.

We would expect a 6kW solar system in Norfolk Island to produce 25.80kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.
