How much solar power does North Macedonia have?

By the end of 2023, North Macedonia had deployed 535 MW of solar capacity, a significant increase from 190 MW at the end of 2022, according to the International Renewable Energy Agency (IRENA).

Will VCIG acquire a solar farm in North Macedonia?

VCI Global has engaged the consulting firm OTB Solutions Dooel Skopje in North Macedonia to identify and secure additional solar farm opportunities. "This is the beginning of a series of solar farm acquisitions that VCIG will undertake and looking ahead for more acquisition opportunities across Southeast Asia and Europe.

How much will ESM invest in North Macedonia?

Final bids are expected in the second half of 2022. The investment is estimated at \$640 million and will be crucial for balancing the electricity system. ESM owns and operates North Macedonia's only wind farm, a 36.5 MW park in the southern part of the country. It plans to increase capacity with two separate 14 MW investments in the same area.

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, a few solar power plants, a few biogas plants, and one wind power farm.

Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

Does North Macedonia have a decarbonization goal?

Despite historically relying on lignite coal mining for approximately 30% of its electricity production and gas imports for an additional 15%, North Macedonia has set ambitious decarbonization goals.
