?? 2 years ago me and @kkarlsons @kristaps.va @jkaarma decided to build @oxdrive.lv ?? Today we celebrate @oxdrive.lv turning 2 years old >> this journey has been the best EMBA we could have wished for! ? We have the best people around -- team ? @rkarv @tomas_vucans @elinaavdejeva @rolandspulins @e_d_g_a_r_s.m @alise ...

OxDrive is a leading supplier of extremely durable, high torque electric hubs (e-hubs) for agritech use. OxDrive e-hubs range from 250Nm to 3200Nm, and are unique in their full integration of ...

OxDrive e-hubs and GoFAR architecture have been used in an array of applications, from agritech through to press launch of concept cars. All applications have common themes in requiring robust, high torque electric drivelines, enabling the customer to build a mobile product or service. Our products are designed for robustness, and do not ...

OX Drive | 1,487 followers on LinkedIn. The coolest thing in Latvian mobility since the horse. | OX Drive is a car-sharing and long-term rental service offering the ultimate cool lifestyle experience driving a Tesla. Sustainable mobility made simple and fun with the OX Drive app. For individuals and B2B clients.

OxDrive specialises in the design and manufacture of robust, integrated, electric drives for off-highway use, including agritech, construction and more. The need for "one box" integrated units with gearbox, motor, motor controller and brake ...

The Lincoln Institute for Agri-Food Technology (LIAT) is part of the University of Lincoln. It is home to a multi-disciplinary team of sector-leading expertise, including artificial intelligence, robotics, engineering, crop science, environmental sustainability, food manufacturing, product development and supply chains.

The OX Drive Android app is an extension to Open Xchange's OX App Suite/OX Cloud and requires an active OX App Suite account. With this app you can access all your photos, files, documents and videos that are stored in OX Drive- at any time and from any Android device.

OxDrive E-hubs. Climate crisis and labour availability are driving huge change across industries, including agri-tech, construction & mining. Within agri-tech alone, the UK has a net zero deadline set for 2050, and a seasonal labour shortage of 10-25%. Automation and electrification play a key role in addressing these challenges.

The OX-Drive ENERGY (OXD E) battery modules are a compact modular format with versatile fitment dimensions, alternative voltage configurations, robust construction, advanced battery chemistry, and OEM level of performance.. ...

OxDrive is EIS/SEIS approved, and we are currently in a late seed funding round to transition the e-hubs from low volume pre-production sales into initial volume production, develop our customer base, and further enhance product capability and range.

The OxDrive e-hub development programme was funded by a grant from Innovate UK and carried out with several partners, Horton adds. Performance Projects led the programme, overseeing the engineering and designing the ...

Terence co-founded the consultancy from which OxDrive was born, leading the design of many innovative projects including two autonomous tractors and the OxDrive driveline family. About the company OxDrive specialises in the design and manufacture of robust, integrated, electric drives for off-highway use, including agritech, construction and more.

Latvia is way more technologically advanced than many of its peers in Europe. EV infrastructure is fast growing. For example I must admire the OX Drive oxdrive.lv car sharing in Riga. They have ...

Performance Projects would like to announce the formation of OxDrive Ltd. Specialising in the supply of integrated, rugged, high torque drivelines for agritech, construction and more, OxDrive Ltd is the result of the £0.5m Innovate UK backed collaborative project lead by Performance Projects. Chris Horton, Managing Director, comments "OxDrive units set the standard for [...]"

The 8kW OxDrive is developed for medium format electric vehicles, whether autonomous or manually driven. Typical applications include All Terrain Vehicles (ATVs), small to medium format tractors and specialist functions such as crop sprayers up to 9T. (Image shows 8kW OxDrive e-hubs fitted to the ARWAC V5 vehicle)
