The Palestine Real Estate Investment Co's (PRICO) rooftop solar energy facility is IFC's first large-scale solar energy installation in Gaza and is supported by the IFC-Canada Climate Change Program. The largest of its kind in Gaza, the ...

OverviewSolar powerWind powerBiomassNational policyBarriersExternal linksRenewable energy in Palestine is a small but significant component of the national energy mix, accounting for 1.4% of energy produced in 2012. Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory frame...

Diversification of energy sources is key to a resilient sector, balancing out Israeli imports with new sources of traditional and green energy. A desirable outcome for 2030 would be an energy mix that combines domestically produced Palestinian gas-fired power and solar energy, with power imports from Israel and other neighboring countries.

Palestine is one of the MENA countries which has taken concrete steps to revive investment in RE, as a clean and independent source of electricity production, to achieve its energy security, it has a wealth of solar energy, around 3000 sunny hours all year round and a high average solar radiation on horizontal surface 5.4 kW h/m² /day [3,4]. While it ranked first ...

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be ...
