Thanks. I know for sure easun uses a different protocol/registers. The link to powmr 4500/6500 seems
interesting. Edit: Major development, writing works ... To connect to it, I'm flashing esphome into an esp32
board, which allows me to have that web server over wifi (and home assistant integration), the board is
connected to a RS485 bridge to ...

Hi fedott, I am thinking with the new inverter. I have esphome running (flashed the original 8266 dongle) and it can read data. But when I try to change it (I tried both mqtt and home assistant api it hangs and does not respond. I am only working with 3 sensor and this number to change, no ota, no logger (to keep resources low)
