

What is a paternoster storage system (PNL)?

The paternoster storage system (PNL): A vertical carousel for maximum performance in a limited space. A circulating storage system in the form of a paternoster is particularly popular for small parts warehouses, as the advantages are obvious. On the one hand, space can be optimally utilized by building "upwards".

Can a paternoster be used with open-fronted storage containers?

The paternoster can be used with open-fronted storage containers to efficiently handle small parts via small parts containers, for example. They can be stored loose and without packaging. Important: A paternoster storage system as a circulating storage system cannot be extended at will. This is due to the rigid outer shell.

What is a paternoster warehouse?

Note: A paternoster warehouse is based on the goods-to-man principle and facilitates the picking of small parts, which are made accessible quickly and compactly via so-called removal openings. It enables efficient, directly controllable storage, guarantees a high circulation speed and increases the storage area even where space is limited.

What is a paternoster & how does it work?

Shelving systems such as the paternoster can be tailored to the specific needs of the company, for example specifically for card index boxes or as a tiered paternoster for dispatch handling. It would also be conceivable to design the rail guide horizontally (so-called silo paternoster) in order to fully utilize storage space as far as possible.

What services do you offer in a paternoster shelf?

Long goods, plates, profiles, stacking boxes, parts, devices, pipes, shafts, pulleys, rollers, cable drums, tools, etc. We offer the right carrier set in the paternoster shelf for any storage product. Planning, production, and installation of carousel shelf systems. Other services include maintenance, repair, and conversion work.

What is a paternoster shelf?

The paternoster shelf (carousel shelf), with its specially adapted carrier sets and receiving spaces, permits addition and removal of any material in a comfortable, and most importantly safe, manner. A specially developed modular system allows for cost-effective solutions despite custom adjustments to each application.
