

# Portugal active solar

How much solar power does Portugal have?

The Cerca photovoltaic plant begins operation, delivering the renewable capacity assigned to EDP Renewables in Portugal's first solar energy auction. The project has a 202 MWp capacity, sufficient to power nearly 100,000 households. EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition.

What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.

How much solar power does EDP have in Portugal?

The project has a 202 MWp capacity, sufficient to power nearly 100,000 households. EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables' largest solar plant in Europe, located in the Lisbon district.

How much solar power will Portugal have by 2030?

Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030. The Serpa solar power plant is an 11 megawatt plant covered 150 acres (0.61 km<sup>2</sup>) and employs 52,000 PV panels. The panels are raised 2 meters off the ground thus allowing grazing to continue.

Are there solar farms in Portugal?

As it stands, there are a number of large and medium-scale solar "farms" in operation globally. Portugal has a particularly ambitious plan to overhaul its energy production, and is already home to a number of exciting projects to support this.

Does Portugal have a solar market?

Portugal, however, offers room for expansion in the self-consumption and floating solar markets. The Portuguese government devised two market mechanisms, auctions and direct agreements, with the goal of installing 9 GW of PV capacity by 2030. Permitting issues, though, might be impeding the accomplishment of this objective.
