

Portugal power grid contractors

Are there alternative electricity suppliers in Portugal?

EDP, Iberdrola or Endesa are the best known, but there are also alternative electricity suppliers. What is the price of electricity in Portugal? Who are the different Portuguese energy suppliers? How to open an electricity contract in Portugal?

Why is electricity so expensive in Portugal?

In fact, VAT is 23% in Portugal, and the various additional taxes make the country one of the most expensive to provide electricity. Indeed, without these taxes, Portugal would have almost the cheapest electricity in Europe. Here is the average price of domestic electricity in the different countries of the European Union:

How much wind power does Portugal produce?

The pumped-storage hydroelectricity plant at Frades works as 880 MW for generation and 780 MW for pumping. Portugal produced 20% of electricity with wind power in 2017 and had the average year capacity of 14% of wind power in the end 2010. Wind power capacity was 3,357 MW in end 2009 and 3,702 MW in end 2010.

"The power grid has been restored to normal," said the EDP group company in a statement sent at 1:38 pm. The bad weather that hit the country on Wednesday left around 400,000 people without electricity, especially in the North, the region that was most affected.
