The influx of client/server rack equipment is changing the content of data centers. There are more devices than before, and they consume less power than their predecessors. Therefore most Power Distribution Units (PDUs) run out of circuit breaker poles before they run out of rated capacity. The Liebert RDC extends the functionality of the PDU by packaging 168 poles (four ...

Rack Power Distribution Units (rPDUs) are the last link in the power chain and ensure delivery of critical power to IT loads. ... Depending on the power available, the cabinet density could be limited or additional rPDUs will need to be deployed in the same cabinet to reach the power capacity required for the deployed equipment. Power ...

If you are looking for reliable and secure power distribution for all IT devices in your equipment cabinet, Server Technology Metered PDUs might be the perfect, affordable solution. Metered PDUs feature an auto-flip input current LED display that monitors the load to help prevent overloads and simplifies load balancing in high-density cabinets.

Floor-mounted PDUs, also known as main distribution units, can supply 300kVA or more to power multiple racks and cabinets. Standard-density rack mount PDUs are generally rated up to 5kW, and high-density PDUs up to 10kW.

The Liebert TFX is a floor-mounted power distribution unit offering reliable single or two-stage power in small to mid-sized data centers, server rooms, network closets, and modular and containerized deployments. It is ideally suited for edge data centers and other remote facilities. The compact 36-inch-depth cabinet offers easy mobility.
