Why is PE investment in battery energy storage growing?

PE investment in battery energy storage systems is surging, fueled by their high return potential and growing energy transition demands. PitchBook data shows that PE investments in energy storage and infrastructure have more than doubled since 2014, reaching \$21.1 billion in 2024 alone.

Are energy storage solutions still private?

The best energy storage solutions are still private- won't have IPO for several years - which will then make current energy storage tech stranded assets...;) @Moats and Income Plenty of cash both in private and public markets. I see potential public winners also.

Is energy storage a good investment?

Energy storage is an attractive emerging high-growth sector. It's still wide open with many upcoming companies. The market has seen more pure energy storage players coming online with different technologies. These are often high-risk, high-reward investments. ESS (energy storage solutions) offers a compelling new segment in renewable energy.

Is battery storage a fundamental part of energy infrastructure?

"Battery storage is now viewed as a fundamental part of energy infrastructure, much like LNG terminals and oil tankers," said Gresham House infrastructure and energy transition investor Lefteris Stakosias. Stakosias said this investment boom reflects a broader shift in the global energy market toward renewables.

What are the future opportunities for energy storage?

Energy storage is a fast-emerging sector. Pumped hydro is the most used solution for now. Batteries are the next step to support renewable energy. Lithium technologies lead the way, but many upcoming technologies have different benefits. I provide an overview of possible opportunities.

Is battery storage a good investment?

Debt financing also plays a strategic role in cashing in on the potential for high returns, with storage projects often securing leverage between 60% and 80% of project costs, contingent on revenue certainty. Despite the strong return prospects, battery storage investments also have notable risks.
