Currently, in San Marino, CA in the month of December, 2024, the cost per each watt for solar is \$2.92/W. In accordance with this price, expect to spend \$2,920, on average, for every 1000 watts (or 1 kW) of solar energy your solar system will need to produce.

If you pay for your system with cash, you'll save about \$117,565 over 25 years (the warranty term of most solar panels) on electricity costs with a 5 kW system in San Marino, CA. We generate this estimate based on real solar quote data from our Marketplace. It considers your system's cost, the federal tax credit, and inflation rates.

San Marino -- a small but progressive republic -- has achieved an impressive milestone in its renewable energy journey. Over the past 15 years, the country has installed more than 4,200 private solar systems.. This remarkable achievement places San Marino among the global leaders in solar power production, with 450 watts of energy produced per capita.
