

Red line energy storage

What types of energy storage systems does Redearth offer?

RedEarth has a range of Australian-made, on-grid, off-grid, and hybrid energy storage systems. Plus, our energy storage systems are scalable, so you can be confident you're getting a solution that best suits your needs. Putting the power back into your hands with our Private Power Plant

Why should you choose Redearth for energy storage?

RedEarth is leading the charge in energy storage. With us, you don't just power your home, you invest in your future. Discover how to future-proof your home and turn your excess electricity into an income stream. With RedEarth, you get more. Australian-Made Energy Storage Solutions

What is Thin Red Line Aerospace doing?

Thin Red Line Aerospace is working on the ICARES Project at University of Nottingham, UK. They are supporting this project with design and fabrication of undersea vessels up to 50 m³. Project efforts include concept development for volumes up to 6000 m³.

Who is Redearth energy storage?

RedEarth Energy Storage acknowledges the traditional custodians of the lands on which we operate and throughout Australia, and their continuing connection to the land, water, and culture. We pay our respects to ancestors and Elders past, present, and future.

Why is energy storage important?

Storage is a fast-start, fast-ramp resource with bidirectional capabilities to help to accommodate new load growth, integrate renewables and minimize curtailment, achieve resource adequacy, and improve system reliability and restoration. Energy storage strengthens the grid at both distribution and transmission levels.

What is Thin Red Line's UHPV technology?

Thin Red Line's UHPV technology facilitates the lowest mass and encumbrance airbag system of any competing design. It can be characterized and validated analytically for a broad range of impact attenuating applications without unduly complex and/or extensive testing.
