

Who regulates electricity in Senegal?

These include the Ministry of Petrol and Energy, the Regulatory Commission of the Electricity Sector (CRSE - Commission de r#233;gulation du secteur #233;lectrique), the Senegalese Agency for Rural Electrification (ASER - Agence S#233;n#233;galaise d'Electrification rurale), the National Agency for Renewable Energy (ANER), and Senelec.

How does Senegal support regional energy cooperation?

Senegal supports regional energy cooperation as a member of the West African Power Pool (WAPP) and is a member of regional organizations to develop hydroelectricity resources on the Senegal (OMVS - Senegal River Basin Development Organization) and Gambia (OMVG - Gambia River Basin Development Organization) rivers.

What is the second emerging path in the Senegalese energy sector?

The second emerging path in the Senegalese energy sector arises from the mini-grids and stand-alone solutions, markets not yet penetrated by foreign investors. These give local companies an opportunity to shape the market according to their capabilities, the needs of the population, and local conditions.

How has the Senegalese energy sector changed over the years?

While the Senegalese energy sector has for decades been characterized by the dominance of the Ministry of Energy and the state-owned power utility Senelec, reforms of the sector have been carried out with multi-actor involvement and under the strong influence of bi- and multinational institutions.

Are emerging energy paths in Senegal based on EEG?

This study provides a contribution to fill that gap by exploring the emerging energy paths in Senegal through the lens of EEG, using the framework of regional path creation processes to analyze qualitative interview data from 17 experts in the Senegalese energy sector.

Will path transplantation contribute to achieving energy goals in Senegalese?

Still, these large scale projects realized through path transplantation are expected to contribute substantially to meeting the energy goals set by the Senegalese government - the share of renewable energy in the electricity mix to reach 20 % by 2020 and 23 % by 2030 .
