Electrilabs entered the solar market as a PV Solar Power Energy Supplier back in 2012 when this technology was emerging strongly in Europe. Turn-key solar systems have been developed and exported as far as the Democratic Republic of the Congo (DRC) where a complete freezer-room solution was designed and shipped for a remote location which is completely off-grid.

Electrilabs have chosen to offer only a selected number of battery products to its clients. Each of the battery technologies were trialed and tested prior to considering any of these products good enough to offer to our clients.
