

Serbia hsi energy

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What does a solar project mean for Serbia?

For Serbia, this project means more than just meeting renewable energy goals. It promises energy independence, economic stability, and a sustainable energy supply. By creating a network of self-balancing solar plants, Serbia strengthens its energy security, attracts green investments, and aligns with global environmental standards.

What is Serbia's energy supply in 2021?

Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%). Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply, respectively.

How much hydropower does Serbia have?

Serbia has plans to significantly expand its installed hydropower and renewables capacity in the coming years. It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27 percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

What is a 1 GW solar power project in Serbia?

1 GW Solar Power Project in Serbia, set to transform the country's renewable energy landscape and boost sustainability efforts.
