What is FSM's energy audit approach?

An ambitious and comprehensive energy audit approach will be applied that reflects FSM's high electricity tariffs, real energy service needs, looks for interdependencies between EE measures and establishes models of energy use for meaningful baseline and post-renovation EE comparisons, and provides actionable energy savings measures (ESMs).

What is the impact of the FSM project?

The project is aligned with the following impact: sustainable social and economic development of the FSM promoted through the provision and utilization of cost-effective, safe, reliable, and sustainable energy services, per the FSM National Objective for Energy.

Who are the PAB members of the FSM National Energy Group?

The PAB members of the FSM national energy group will comprise the NPD (DE/DRD), and state level energy representatives. The PAB will provide overall management guidance, project assurance and oversight for the implementation of the project.

Does FSM support the MPSBEE project?

There is strong support from the FSM national and state governments to the MPSBEE project as a contribution to the FSM 50% EE target, and as FSM prepares for the 2023 end of US Compact II funding support. To contribute to global efforts to reduce GHG emission, FSM intends to improve EE and increase the use of RE.

Why did SPC congratulate the FSM?

SPC Deputy Director General Cameron Diver congratulated the FSM for its commitment to finding and driving long-term energy solutions that demonstrate to the rest of the world the benefit of transitioning towards more environmentally sound solutions for its people.

Where is FSM located?

FSM (the Federated States of Micronesia) spreads over 2,900 kms and is located in the western Pacific Ocean just north of the equator and east of the Philippines and north of the island of New Guinea. FSM is comprised of four semi-autonomous states (Chuuk, Kosrae, Pohnpei, and Yap) and includes 607 islands (74 of which are inhabited).

April Weather in Micronesia Micronesia. Daily high temperatures are around 86°F, rarely falling below 84°F or exceeding 88°F. Daily low temperatures are around 79°F, rarely falling below 77°F or exceeding 82°F. The highest daily average low temperature is 80°F on April 25. For reference, on October 12, the hottest day of the year, temperatures in Micronesia typically range from ...
