

Foresight Energy Infrastructure Partners, Foresight Group's energy transition fund, has announced an investment into the development of a new pumped storage hydro ...

Hydrostor partners with Perilya to develop the Silver City Energy Storage (SCES) project using A-CAES technology to provide reliable backup power for Broken Hill.

ARENA's funding for the Silver City Energy Storage Project, developed by Hydrostor, is conditional upon the project reaching financial close, which is expected to occur in late 2023. ...

The Silver City Energy Storage ("Silver City") is an Advanced Compressed Air Energy Storage project capable of 200MW generation for 8 hours duration ...

Yttrium-doped silver niobate ( $\text{AgNbO}_3$ ) ceramics, fabricated via a hydrothermal method, show promise as high-performance, lead-free antiferroelectric materials for dielectric ...

Solar cells are amongst the most mature green energy technologies, providing a sustainable alternative to carbon-intensive fossil fuels. This technology depends on ...

Overview Silvermines Hydro is a project that will repurpose an old mine site into a major clean energy facility in Ireland. It will be the second pumped storage power station in the country, ...

Clean energy technologies - from wind turbines and solar panels, to electric vehicles and battery storage - require a wide range of minerals and metals. ...

To help future-proof against rising fuel costs, mines are now adding renewable energy sources and storage technologies to run mining operations, while improving power quality efficiently ...

The project is co-owned by Foresight Energy Infrastructure Partners and Siga Hydro, with their respective ownership stake of 50% each. Silvermines PSP is a pumped ...

The Silver City Project uses Advanced Compressed Air Energy Storage (A-CAES) technology and represents a game changing outcome for mining in Broken Hill MELBOURNE, AUSTRALIA, ...

Thermal Energy Storage (TES) has gained prominence as a viable solution for storing surplus heat and cold underground. While traditional TES systems primarily rely on natural aquifers, an ...

Silvermines Hydro is a project that will repurpose an old mine site into a major clean energy facility in

Ireland. It will be the second pumped storage power station in the country, following ...

The application of multi-source complementary technologies such as solar energy, wind energy power generation, and off-season cyclic energy storage technology can ...

The world's energy transition hinges on a metal so critical that shortages could derail the green revolution: silver. For every gigawatt of solar energy produced, 700,000 ounces of silver are ...

2 &#0183; As of October 14, 2025, Argentina's mining industry is experiencing an unprecedented surge, with exports reaching historic record levels throughout the year. This remarkable ...

There are financial incentives for the local energy company Sala-Heby Energi AB to build storage for district heating water in the mine. Such a solution is found to create benefits for both the ...

December 11, 2023 Long duration energy storage developer and operator Hydrostor has reached an agreement with Transgrid that will see Hydrostor's 200MW/1,600 MWh Silver City Energy ...

An old Broken Hill mine site will soon be transformed into a first-of-its-kind compressed air energy storage system, delivering energy security, jobs and investment to ...

Hydrostor partners with Perilya to develop the Silver City Energy Storage (SCES) project using A-CAES technology to provide reliable backup power for Broken ...

Let's face it - when you think of coal mines, &quot;cutting-edge energy innovation&quot; probably isn't the first phrase that comes to mind. But here's the kicker: modern coal mines are ...
