

The WebdynModbus ? manages data from Modbus equipments. On a single box, the gateway includes a RTU/TCP Modbus, GPRS/ WiFi and Ethernet interfaces to communicate with the information system. Installation is carried out via ...

In Kombination mit einer Kommunikationseinheit wird der digitale Zähler zum Smart Meter. Diese intelligenten Messsysteme helfen auch dem Smart Grid, denn sie können Daten zu Stromerzeugung und -verbrauch in Echtzeit übertragen. Dadurch weiß das Smart Grid nicht nur, wo gerade wie viel Energie verbraucht wird, sondern auch, woher Strom kommt.

In an increasingly fast, smart and automated world, the need to capture the consumption data of supplies (electricity, water and gas) becomes essential to save costs and achieve greater efficiency and savings. Thanks to our range of IoT devices specially designed and thought for Smart Metering solutions, it is possible to read the main current interfaces and protocols and ...

The government of Equatorial Guinea has selected MAECI Solar, together with GE Power and Water systems and Princeton Power Systems, to design Africa's largest self-sufficient solar microgrid, handling 100% of the ...

Mit der Smart-Grid-Funktion können Sie Ihre aktuelle Viessmann-Wärmepumpe (WP) von einer PV-Anlage anfordern lassen, sobald ausreichend Solarertrag vorhanden ist. Es ist hierzu eigentlich nur eine Vitotronic 200 Regelung vom Typ WO1C. Über den dort integrierten Schaltkontakt 216 lässt sich die Verbindung herstellen, worüber ein ...

The MTX-Router-EOS can be used in many different IoT applications like kiosk, telemetry, remote sensing, smart grid, security, industrial automation, etc. Download the product sheet User manual. Customer support Application cases. Technical specifications Strengths & benefits / Applications Specifications Other specs.

There are two configuration solutions, using the web interface and using text messages: Configuration using the web interface: Start by establishing a connection to the concentrator by connecting to it to access the server configuration: Enter the "ethernet" or "modem" connection type: For an ethernet configuration, make sure the IP parameters are compatible with server ...

Suchen Sie etwas anderes? Suche & Zurück zur Wissensdatenbank MODBUS_ parameters can configure MTX-Tunnel to take modbus RTU device readings. The Modbus RTU device is connected to a serial port on the modem of MTX Terminals and the internal registers are read. It is also possible to read and write modbus variables with AT^MTXTUNNEL=GETMODBUS and ...

This Equatorial Guinea Solar Production Report provides comprehensive insights into the statistics and developments of the solar energy industry in Equatorial Guinea.

In this issue of Photovoltaics International Fraunhofer ISE presents a concept for a bifacial, shingled cell technology that it claims tracks a cost-effective route to a 400W module using existing ...

Suchen Sie etwas anderes? Suche & Zurück zur WissensdatenbankScenario Details Some router models from the Titan family have internal GPS. That means that on top of the usual 3G router tasks (provide Internet connectivity to connected devices), it is also possible to perform additional tasks with the GPS location. The MTX-Router-Titan-mini-3G-GPS is connected to a PLC via [...]

The government of Equatorial Guinea is installing a self-sufficient solar microgrid project in Annobon Province in partnership with three American companies: the consulting firm MAECI Solar, GE Power & Water ...

Dementsprechend benötigt ein Smart Grid nicht nur Strom-, sondern auch Datenleitungen für die sichere und zuverlässige Kommunikation untereinander. Auch deshalb sprechen viele Experten vom "Internet der Energie", wenn es um intelligenten Stromnetze geht. Intelligente Messsysteme stellen beim Smart Grid die zentrale Einheit dar.

Suchen Sie etwas anderes? Suche & Zurück zur WissensdatenbankIf we still have doubts after reading the previous list of benefits, we recommend reading the following FAQs where everything we need to know about the main characteristics of the MTX-Router-Titan II, MTX-Router-Titan and MTX-Router-Titan mini devices is explained in a detailed manner. What is the physical ...

Titan routers are able to send email notifications. They also allow emails to be sent using AT commands. For example, if we have a PLC and wish to send an SMS or email, we can send an AT command to the MTX-Router-Titan-3G device to do it.. The router must be configured beforehand to be able to receive emails:

The 40MWac Khoumagueli Solar project will be Guinea's first grid-connected solar photovoltaic plant and is designed to complement power generation at the nearby 75 MW Garafiri hydroelectric plant. The facilities will combine to maximise delivery of renewable energy to the national grid, with Khoumagueli Solar expected to mitigate against the ...

The WebdynEasy W M-Bus 868MHz or 434MHz hub is designed for wireless networks using wireless M-Bus radio technology. Its main functions are the standalone collection of data from meters or wireless M-Bus sensors.

There are two configuration solutions, using the web interface and using text messages: Configuration using

the web interface: Start by establishing a connection to the concentrator by connecting to it to access the server
...

Suchen Sie etwas anderes? Suche < Zurück zur WissensdatenbankQuick guide to the emulation software for serial ports. Introduction: One of the most used pieces of software to emulate serial ports nowadays is VSPE. This is a free piece of software for 32 bit Windows operating systems. There is also a paid version for 64 bit platforms. [...]

MTX-T2 is an innovative and powerful all-in-one solution for the most demanding M2M and IoT applications that allows the transmission of high-speed data LTE / 4G / 3G / 2G, CSD and SMS. The MTX-T are programmable in Java J2ME and have a complete set of interfaces (2xRS232, mini USB, 1x digital input) avoiding the need for more hardware, shortening the time and ...
