

Smartflower solar price europe Saint Helena

How much does a smartflower solar panel cost?

Now, let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

What is smartflower solar?

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop panels.

How much solar energy does a smartflower produce a year?

Depending on location, a SmartFlower can produce 3,800 to 6,200 kWh of solar electricity per year - which is around 40% more than compared to what conventional solar panels produce.

What is the warranty on a smartflower solar panel system?

The SmartFlower solar panel system has a system warranty of 5 years and a module performance warranty of 25 years. This also differs from other solar panel systems that have 20 to 25-year warranties for both the system and performance. Even most ground-mounted systems with sun-tracking capability have 10-year system warranties.

Is smartflower still available in Europe?

Since the Austrian company SmartFlower Energy went bankrupt, it is no longer purchasable in Europe. This said, an equivalent model simply named "SmartFlower" is still commercialised in the US. This model is very similar to the POP version, aside it being slightly more powerful (205 kWc) and available in fewer colours (white, grey, green and blue).

Is smartflower better than a rooftop solar system?

Smartflower has a considerably longer peak phase than a rooftop solar system and produces energy even in the fringe hours of the day. Efficient power generation: up to 40% more yield thanks to smart tracking, with needs-based precision whenever you require electricity.

Smartflower verwendet fortschrittliche Robotik und Automatisierung, um die Sonne intelligent zu verfolgen und erzeugt über 40% mehr Energie als herkömmliche stationäre Solarmodule. Darüber hinaus faltet sich Smartflower jeden Tag bei Sonnenuntergang automatisch zusammen und reinigt sich selbst, um die maximale Sonnenauslastung ...
