2 · A good quality Li battery will accept a 0.5 C charge rate. The budget battery offerings can only do much lower rates because they have a mediocre BMS or cells that cannot dissipate the heat. But staying within the rating, you can buy an IOTA charger that will push those power levels. There are other brands as well.

Your geographical location plays a big part in how many average peak sun hours you get on a daily basis. The "Peak Sun Hours Map" is a good illustration of how varied our country is when it comes to average solar irradiance.
