Firstly, Solar is not a direct replacement for your existing utility company electric supply. For example, if, at the moment, you have several 220 Volt air conditioners that are running day and night, then solar is not for you. If you think solar will save you bundles of cash in the short term, then you will have to think again.

While the national average of solar panels is \$2.66 per watt, solar panels in Panama City generally cost around 3 cause a 5.7-kW system is needed to cover the energy usage of a typical home in Panama City, the average price of going solar will be about \$12,844 after claiming the federal solar tax credit of 0.
